Dear Ms. Fratus:

This is in response to Mr. Merrill Hohman's letter received by us on August 2, 1988 in which he notified Olin Corporation of the potential liability of Olin-Hunt Specialty Products Inc. ("Olin-Hunt") with respect to the above referenced Site. The letter requested certain information Olin may have in connection with the release of hazardous substances into the environment, or the disposal of hazardous waste, at the Site.

We have researched our corporate records and at this time have not found any information responsive to the request. You should know that Hunt's East Providence Dye Plant was demolished several years before Olin acquired Hunt Chemical Company, now a wholly-owned subsidiary of Olin Corporation.

We conducted a records search at our current Limerock and East Providence plants and found no records that indicate any involvement with this Site. Therefore, we formally request that your office make available to us any information which details the volume and nature of those substances allegedly contributed by Olin to that Site. Additionally, please identify any other names for, or descriptions of, the Site which could provide us with further avenues to explore within our own filing system. Pending receipt of that information, Olin can not further respond to your request for information.

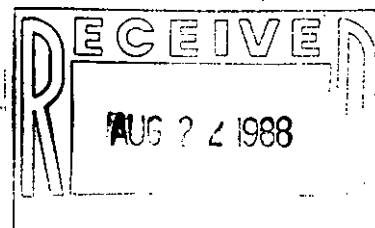

We will await your response to this letter.

Sincerely,

Natalie Elaine Nelson
